## SAS Traffic figures - May 2022

### 1.8 million passengers traveled with SAS in May

During May more than 1.8 million passengers traveled with SAS, an increase of approximately 350% compared to the same month last year. SAS' capacity increased at the same time by 200% compared with the same period last year. In comparison with last month, the total number of passengers increased with 18% and capacity was increased by 13%. The flown load factor for May was 71%, an improvement of 35 percentage points compared to May last year.

“Our ramp-up continues and I am happy to share we have now also started flying to and from Toronto. Overall ticket sales are positive as we are approaching the summer peak period. However, the whole aviation ecosystem is currently faced with challenges and to minimize the operational risk for summer SAS has made pro-active adjustments to its traffic program. Meanwhile, the crucial work on the necessary transformation of SAS continues”, says Anko van der Werff, President & CEO of SAS.

RPK – Revenue passenger kilometers

ASK – Available seat kilometers

Load factor – RPK/ASK

Yield – Passenger revenues/RPK (scheduled)

PASK – Passenger revenues/ASK (scheduled)

Change in CO<sub>2</sub> emissions per available seat kilometers – SAS passenger related carbon emissions divided with total available seat kilometers (incl non-revenue and EuroBonus tickets), rolling 12 months vs rolling 12 months previous year

Carbon offsetting of passenger related emissions – Share of SAS passenger related carbon emissions compensated by SAS (EuroBonus members, youth tickets and SAS' staff travel) during the month

From fiscal year 2020 we report change in CO<sub>2</sub> emissions in total and per Available Seat Kilometers (ASK) to align with our overall goal to reduce our total CO<sub>2</sub> emissions by 25% by 2025, compared to 2005.
